

Welcome to the Security Executive Council Insight.
Our monthly update on SEC projects, resources, initiatives and emerging trends.

From the leading research and advisory firm for security risk mitigation leaders

A Process for Creating a Strategic Master Plan and KPIs

There are a number of elements to consider when creating a strategic master plan for corporate security. This process will help keep the key items in mind.

[Don't miss the example KPIs that can be used to monitor the impact of your strategic plan >](#)

Making Security's Value More Visible and Measurable

A common goal for security practitioners is leading senior management to an increased understanding and appreciation of security's contribution. Our resident expert on measuring and communicating value shares some insight on how to accomplish this objective in our Faculty Advisor blog.

[Here are some ideas you can apply in your organization to make the value you bring evident to management >](#)

The Essentials of a Physical Security Systems Risk Assessment

This brief guide includes identifying goals, assessing the needs of the business, and combining the fundamental elements of security into a coherent assessment of risk.

[Quickly read on-line or download a copy for later reference >](#)

Site Risk/Threat Assessment Ranking Template

This template was designed to assist security leaders in ranking risk and mitigation priorities, which is one fundamental part of a comprehensive risk management strategy.

[Download the site risk/threat assessment ranking template here >](#)

In Case You Missed It...
