

PROGRAM DEVELOPMENT OR ENHANCEMENT

Supply Chain Security

Do you struggle to hold your logistics providers accountable? Are your transportation, loss, and theft claims rising? Do you worry if your parts and service providers are legitimate? Are you keeping your brand secure from counterfeit and taint? How do you manage your third-party risk and compliance?

In today's global landscape, supply chains face numerous challenges, from cyber-attacks and organized crime to geopolitical crises, COVID-19 impacts, and ever-changing threats. Do you have your arms around all the details?

How Can the SEC Help?

- Conduct a thorough review of your end-to-end supply chain security processes.
- Conduct key stakeholder interviews to identify the gaps.
- Provide tailored recommendations for improving compliance and identifying value-added opportunities.
- Establish metrics to track program and measure your progress and success.

Transformation

Safeguarded operations, enhanced brand reputation, and increased customer trust allows your organization to hone your competitive edge.

The SEC is the only research and advisory firm that specializes in corporate security and is comprised of former security executives. We understand the issues and work to remove obstacles to program and leadership success.
